

Empowering Green Energy

About Us

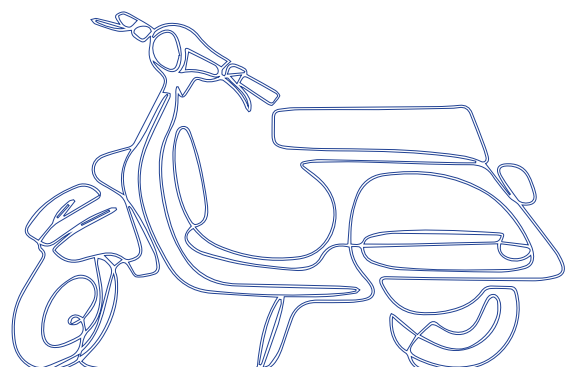

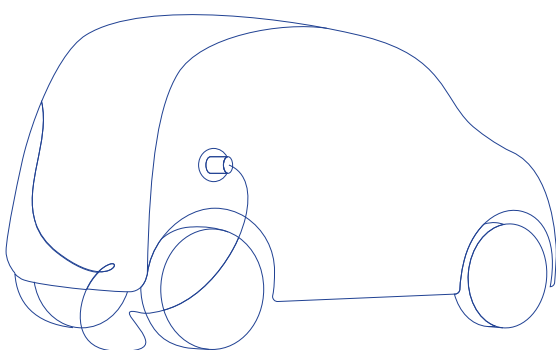

We at Flerov energy present to you a globally acknowledged sustainable and green energy model. We are here to bring landmark changes in the market by not only rejuvenating the work model but also providing better alternatives to promote a sustainable and more environment friendly product. Established in 2021, We here at Flerov energy envision to become global leaders in manufacturing of li-ion (Lithium ion based) batteries, solar panel equipment and sustainable automotive equipment

Our core values are not only driven by our different vision but also very high ethical standards. We strive to build credible and reliable relations with our customers which sets the stage for a lifetime long partnership. We provide our consumers with the best service possible in the market. We not only focus on building relationships on an exterior front but also work cohesively to develop our inner core. We work on an open Communication model with our employees where we take Constructive Criticism and feedback to build our company into a more magnanimous brand. We build strong relationships with our employees. As they say, employees are the pillars that make or break a company. We aspire to turn people working with our organization into Work Professionals who excel in their career

As a company, we have a certain set of principles and values which we respect to make our work environment a Positive and efficient place. We work in a democratic environment where we necessarily disregard any kind of discrimination. Our company promotes a positive workplace environment as it's core structure and any kind of harassment or bullying is strictly prohibited. We follow ethical trade practices and ensure complete transparency with our employees and customers to strengthen our credibility and position as a company

We manufacture Lithium-Ion Batteries using the best-in-class technology while having the necessary regard for the organizational standard. We have gone through a rigorous and informative R&D process to develop our product and it stands out in the market with it's very own and distinctive features.

Green and Sustainable energy is the future and we are combining it with electric mobility. We envision to complete reconstruct the existing transport system in India by making it more environment friendly and cause driven. We are here to change the way power is consumed in form of batteries. We aspire to be the change this Market needed

Make in India

Flerov Energy as a company focuses on empowering and leading India into the future of sustainable energy. We are committed towards making India a global marketplace for designing and manufacturing the best-in-class li-ion batteries, solar panel equipment and sustainable automotive equipment. Our complete manufacturing is based in India and promotes "Made in India" as it's core goal and Value. We not only aim to be the leading manufacturer in India but also thrive to put India on the world map of green energy.

We have developed and launched an efficient Lithium-ion battery packs based on technology that has been designed and engineered in India. We comprise a team of experienced professional who have worked rigorously to design a cohesive and flexible hardware design Structure while at the same time the other part of the Tech team has put a lot of efforts in building the consistent and reliable software structure with safety control. Our products feature is based on best-in-class research and development and are tested, developed and manufactured proudly with "MAKE IN INDIA" signs to show our solitude towards our nation.

Products & Services

Divisions	2-Wheeler / 3-Wheeler, Solar Equipments, electric cycles
Energy Solutions	Nominal operating voltage in the range of 24V, 36V, 48V, 60V & 72V.
Our Presence	25+ Sales & Services Centre Across India.
Modular	Modular Battery Pack, adaptive model for easy of use.
Smart Features	Proprietary BMS, CAN, IoT enabled GPS/GPRS, remote monitoring & control features.

Our Culture

Vision

We envision to create the most compelling electric battery company representing the 21st century as the world's transition phase towards green energy and e-mobility

Mission

To educate and inform people about the alternative options available in the market and bring a lifestyle change in the way energy is bought and consumed. We aim to bring a successful change in the society to drive it towards green and sustainable energy options

Values

We respect democratic environment of Work. We want to promote diversity and inclusion as our core basis of value. Learning to become better, believing in the process and Risking to improve quality are the values we aim to move ahead with. And are a customer centric company and strive for excellence and quality for the customer

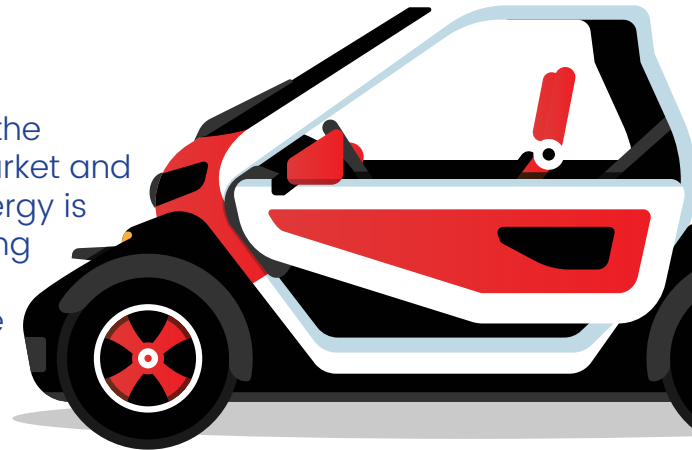

Innovation

We want to constantly innovate and evolve as a company and maintain a quality standard in our products with unique and distinctive features. We want our products to be the best in market and to attain such level of perfection. We go through brief testing to make our product Thorough and Perfect

Customer Satisfaction

We strive to build lifelong relationship with our clients and for achieving it we guarantee and maintain a state of Proper Communication and complete feedback
